ADAM OMER

Dublin, Ireland · adam.omer0403@gmail.com · github.com/mrcheesechase · linkedin.com/in/adam-omer-0aab76373
BSc Computer Science, University College Dublin · Expected graduation June 2029

PROFILE

Stage 2 Computer Science student at UCD who likes building things end to end — from backend services and AI-powered tools to repairing and reselling cars. Co-founder of a two-person cybersecurity + AI startup, where I build backends and cloud infrastructure on Google Cloud. Hackathon builder, comfortable picking up unfamiliar APIs and codebases quickly, and backed by over a year in target-driven sales and customer-facing roles. Interested in startups, AI and automotive engineering.

EDUCATION

University College Dublin — BSc Computer Science Sep 2025 – Present

- Software: Object-Oriented Programming (Java: interfaces, unit testing, exceptions, concurrency); Programming I & II (C); Algorithmic Problem Solving (Python); Functional Programming (Scheme); Databases & Information Systems (SQL)
- Systems & theory: Computer Networking (TCP/IP, OSI stack, routing, congestion control); Computer Architecture; Digital Systems; Formal Foundations 1 & 2 (logic, proof, finite automata); Matrix Algebra

Carndonagh Community School, Co. Donegal — Leaving Certificate 2021 – 2024

EXPERIENCE

Co-Founder — Cyber Supplies 2026 – Present

- Co-founded a two-person student startup working at the intersection of cybersecurity and AI.
- Build and run backend services on Google Cloud (Cloud Run, Cloud SQL / PostgreSQL): a token-authenticated API gateway, storage and notes services, a web-crawling service and a command-line client.

Hackathon Participant — Stripe Hackathon Sep 2026

Outbound Sales Advisor — Forward Emphasis International Jun – Jul 2026

- Converted free-trial members to paid subscriptions over high-volume outbound calls, consistently exceeding monthly conversion targets.

Co-Developer & Marketer — Boltun (boltun.io) 2025

- Co-developed, tested and marketed an autonomous outbound-calling product: AI voice agents that design a cold-call script, dial a contact list and rewrite the script from real call transcripts.

Customer Service Representative — Forward Emphasis, Malin Head Sep 2024 – Aug 2025

- Resolved a high volume of motor-insurance queries under tight deadlines, cross-checking details from policyholders and third parties and explaining cover clearly.

Founder — Vehicle Repair & Resale 2024 – 2025

- Ran my own small business buying, repairing, respraying and reselling used cars, and parting out non-runners to sell working parts.
- Handled sourcing, valuation, mechanical diagnosis and repair, bodywork prep, negotiation and sales end to end.

PROJECTS

OutSpoken — AI speaking coach · HackUCD 2026 · Team of 4 2026

- Owned the backend architecture of a web app that records a spoken take on a prompt, transcribes it and returns AI feedback on filler words, pauses, pace and delivery, with timestamped “try instead” rewrites.
- Designed the API layer connecting the frontend to the OpenRouter API (LLM analysis) and the Stripe API (freemium Pro plan with free trial); deployed on Google Cloud Run.

Nutri-tracker — AI nutrition & weight coach on Telegram 2026

- Python bot that turns plain-English meal descriptions into full nutrient breakdowns via the Claude API, with personalised calorie, macro and RDA targets (Mifflin–St Jeor BMR, TDEE).
- SQLite storage and matplotlib charts for weight progress, calorie history and micronutrient intake; documented and published at github.com/mrcheesechase/Nutri-tracker.

SKILLS

- **Languages:** Python, Java, C, C#, SQL, Scheme
- **Tools & platforms:** Git, GitHub, Linux command line, Google Cloud Run, PostgreSQL, SQLite, VS Code
- **AI & APIs:** Claude API, OpenRouter (LLMs), Stripe, Telegram Bot API
- **Hands-on:** Mechanical diagnosis and repair, bodywork and spray painting, hand and power tools, full B driving licence
- **Spoken:** English (native), Romanian (native)
